# The Original Gypsy Gripper™

---

## To Install:

Be sure the surfaces of your ruler are clean and dry. Flip up both latches so suction cups are released. Place *The Gypsy Gripper* at the desired location on your ruler and press down on the handle while flipping the latches down. \*

## For Use On Smaller Rulers:

Only use one latch to secure a single end of *The Gypsy Gripper* to a smaller ruler. Use the handle normally. The single suction cup will securely hold a smaller ruler while you use your rotary cutter. \*

## To Remove:

Flip up both latches, and gently slide your fingers under the edges of the soft rubber seal at each end if needed, to release the two suction cups.

\* Use with smooth-surfaced rulers only. Make certain that the edges of the suction cups do not extend over the edges of the ruler, and do not position either cup over a hang-hole on the ruler.
