

The Amazing Little Gripper™

Small but mighty, *The Little Gripper* is 2-3/4" wide and 2-3/4" tall, and weighs in at just 2-1/4 ounces.

The perfect way to hold your small templates and rulers in place, *The Little Gripper* makes using them easier and safer. The perfect companion to *The Gypsy Gripper*.

The Little Gripper has a comfortable grip handle with a simple locking lever, and a small round suction cup to secure your tool. Just press the suction cup onto any small acrylic quilter's ruler or template with a smooth surface, then flip up the lever to lock *The Little Gripper* in place. Now you can move the ruler quickly, and easily hold it on the exact position with gentle downward pressure. Your ruler hand will be up and away from the fabric, and out of harm's way if you happen to slip with the cutter. When you need to switch to another tool, just flip down the locking lever to release *The Little Gripper*.

Attaches quickly, and firmly holds ruler position.

Fits most any small ruler, regardless of shape.

The Little Gripper's suction cup works with smooth surface templates and rulers that are at least 2-1/4" wide, including smaller rectangle, square, hexagon, and triangle shapes (with no slots or holes in the area that will be covered by the suction cup). The nifty sculptured handle fits between the fingers and thumb, making *The Little Gripper* easy to position and comfortable to hold, even during long cutting sessions. This handy accessory will make a big difference with your smaller rulers and templates for intricate cutting jobs. *The Little Gripper* and *The Gypsy Gripper* will make a perfect pair for your quilting basket!
